## Reliable Production Rock & ALL TERRAINS

A comfortable operator is a more productive operator, which is why we've equipped the JT30 All Terrain Horizontal Directional Drill operator's station with a cutting-edge design. It features:

- Open-top vise wrenches are angled toward the operator for an excellent view of the tool joint when making up and breaking out pipe.
- Industry-exclusive, double-pivot drill frame allows steep entry angles without raising the tracks off the ground; enhances operator comfort because operator's station stays level.
- Optional cab features climate-controlled heat and air, for greater operator comfort and productivity.
- Operator's station features intuitive joystick that controls all drilling functions, ergonomic seat, color LCD engine display, and an excellent view of all drill functions.

## JT30 ALL TERRAIN HORIZONTAL DIRECTIONAL DRILL

1 Dual independent rear stabilizers are easy to set up and enhance stability on uneven or rough terrain.

2 Hinged main and rear hoods allow easy access to all service points in the engine and mud pump.

3 Among the quietest drills in its class, for less environmental impact, less disruption in urban areas and greater operator comfort.

4 Open-top vise wrenches are angled toward the operator for an excellent view of the tool joint when making up and breaking out pipe.

6 160-gross-hp (119-kW), Tier 4 engine is the most powerful in its class; full power to all machine functions greatly enhances productivity.

5 Patented All Terrain technology has the industry's most advanced inner-rod design, proven to increase production in hard rock and difficult terrain.

You asked for a drill that tackles the toughest conditions, from solid rock to cobble and hard dirt. You wanted a compact design to operate in the tightest spots. You needed a patented, inner-rod design to save you time, and a mechanical drive to save you money on drilling fluid and transporting water. We delivered it all, and much more, with the Ditch Witch® JT30 All Terrain Horizontal Directional Drill.

**WE'RE IN THIS TOGETHER.**

# JT30 ALL TERRAIN HORIZONTAL DIRECTIONAL DRILL

1 Exclusive assisted makeup and breakout feature saves wear on pipe threads and reduces operator fatigue.

2 Add-a-pipe feature places individual pipes into loading system without lifting pipe into the top of the pipe box

3 Field-proven, heavy-duty rack and pinion thrust drive; welded-on double rack offers minimum maintenance and maximum reliability.

4 Optional wireless remote ground drive increases flexibility when moving the rig and allows fine-tuning of bore path placement.

5 Exclusive, dual-pivot drill frame allows steep entry angles without raising tracks off the ground—no need to readjust the machine.

6 SaverLok® System provides the tightest connection and best protection against wear and tear on the drill pipe and drive system; easy to install and replace, requiring no special tools.

7 Heavy-duty anchor system secures machine in difficult terrain so you can push/pull with full machine thrust.

## AT40 ALL TERRAIN DIRECTIONAL DRILL

1

The fully enclosed cab is rated best in the industry based on customer input, and designed specifically with an HDD operator in mind.

2

The operator's platform is equipped with telescoping capability for optimal drilling view.

3

Patented All Terrain connection provides a more reliable connection for optimized performance and steering.

6

Swing-out, lift-off service doors provide easy access for machine maintenance and serviceability.

5

160-gross-hp, Tier 4 Cummins® diesel engine provides 14 percent more horsepower than competitive models in its class.

4

The AT40 All Terrain delivers 40,000 pounds of thrust and pullback—30 percent more thrust in a more compact unit than competitive models.

Optimized for industry-leading performance and productivity in hard rock conditions, the Ditch Witch® AT40 All Terrain directional drill is designed with an advanced version of the proven Ditch Witch All Terrain drilling system. The updated, two-pipe system offers boosted power to the bit—33 percent more torque than competitive units. Patented design enhancements increase cycle times, improve durability and allow for more adaptable steering.

The system also features a new housing enhanced to minimize maintenance, improve reliability and increase its useful life. The drill leverages the same next-generation features of the JT40 model for maximum drilling performance, operator comfort and control.

**WE'RE IN THIS TOGETHER.**

## AT40 ALL TERRAIN DIRECTIONAL DRILL CAB

1

Best-in-class visibility of drilling operations with a clear view to critical vision points, including ground entrance, wrenches, shuttle-retract location, and rear connection.

2

The AT40 All Terrain's Radial Operator Control (ROC) is a multifunctional device that delivers improved operator efficiency.

3

Industry-leading, telescoping cab places the operator at a precise angle, providing an enhanced view of drilling operations.

4

The ergonomic station features a heated seat with adjustable suspension and increased legroom to keep drillers comfortable during long hours on a job.

5

Fully enclosed cab offers premium operator comfort and complete climate control.

6

A real-time position indicator provides operators insight to the carriage location on every drill pipe installation.

7

Equipped with two seven-inch LCD screens for better visibility into all machine functions and diagnostics.

## PIPES INSTALLED IN ROCK

# JT100 ALL TERRAIN HORIZONTAL DIRECTIONAL DRILL

- 1 Large-capacity, 120-gpm (450-l/min) fluid pump plus larger hoses and fittings help move fluid downhole faster, for greater productivity.
- 2 Infinitely variable rotary drive enables the JT100 All Terrain to match spindle speed and torque to power through virtually any soil condition.
- 3 Heavy-duty, double rack-and-pinion thrust drive is field-proven to push/pull through long, tough bores.
- 4 Fully enclosed cab offers instrument panel gauges positioned for visibility, conveniently placed controls and an excellent view of the tool joint.
- 5 Optional onboard loader and exclusive heavy-duty anchor system eliminate the need for large and expensive support equipment, reducing transportation costs, setup time and jobsite size.
- 6 Industry-exclusive, patented All-Terrain two-pipe drilling system provides more power to the bit than any other rock-drilling system in its class.
- 7 100,000 lb (445 kN) of pullback and 2,000 ft-lb (2700 N·m) of torque make the JT100 All Terrain ideal for installations of large-diameter pipe.
- 8 Exclusive dual-pivot drill frame allows steeper entry angles without raising tracks off the ground.
- 9 260-hp (201-kW) engine efficiently delivers tremendous power to all drilling functions so you can get the job done faster.

When you're challenged with a lengthy installation through every type of soil including solid rock, you need the superior power and technology offered by the Ditch Witch® JT100 All Terrain Horizontal Directional Drill. With the JT100 All Terrain you get 100,000 lb (445 kN) of pullback and up to 2,000 ft-lb (2700 N·m) of torque, powered by a huge, 268-hp (200-kW) engine. Everything is engineered to maximize the productivity of the machine's patented All Terrain technology, a two-pipe drilling system that enables you to drill and steer simultaneously.

WE'RE IN THIS TOGETHER.

# HDD TRACKING & GUIDANCE SYSTEM

On the jobsite, interference is everywhere, created by many sources: metal fences, radio signals, underground and overhead utilities, nearby buildings and more. With the **Subsite® TK Series Hdd Guidance System**, you can cut through the noise and complete bores with an unprecedented level of confidence, thanks to its dual locating methods (walkover and DrillTo™), four-frequency beacon, a depth range of up to 110 feet (33.5 m), high-contrast graphics and much more.

## KEY FEATURES

- Two locating methods let you use your preferred method of locating, while using the second method to verify your results.
  - 1) Walkover enables the operator to pinpoint drill head location with peak and null techniques.
  - 2) Time-saving DrillTo™ mode enables the drill operator to make real-time corrections to improve bore accuracy or avoid obstacles.
- Bore-path analyzer software shows which frequency works best for your particular job and conditions.
- Simple, four-button layout is easy to learn and simple to use. High-contrast screen for easy readability in any light.
- Up to four frequencies in a single beacon to help you avoid signal interference.
- Ergonomic upright design reduces fatigue.
- Walkover tracking up to 110 feet with standard-size beacons (15" and 17") is deeper than anything else available. The long 2,000-foot range between the
- TSR Mobile software provides As Built

## TK SERIES HDD GUIDANCE SYSTEM

TK Series trackers provide a deeper locate range – greater than any competing tracker today (up to 110 ft).

## GROUND PENETRATING RADAR / SCANNER

The Subsite **Ground Penetrating Radar / Scanner** will help you locate any type of utility conduit or piping—metallic or non-metallic, including PVC—beneath soil, rock, pavement, and other surfaces. Plus, a user-friendly Windows-based interface provides productivity-enhancing benefits from easy integration of GPS data to reliable wireless connectivity for downloading web-based maps such as Google Earth.

### KEY FEATURES

- :: Locates both metallic and non-metallic pipes and cables to allow one-pass locates at depths of up to 19.7 feet (6 m), depending on soil conditions and antenna selection.
- :: Earth-engaged antenna provides better contact on uneven terrain and reduces signal loss.
- :: Easy GPS connectivity allows you to see your path and marks in real-time as you scan.
- :: With 5.6 mph (9 km/h) survey speed and digitally controlled radar, the 2550GR provides fast, clear images.
- :: Wireless connection allows you to download maps such as Google Earth.
- :: The 2550GR folds up into a size that is easy to transport.
- :: Assisted grid capability allows you to grid your location digitally, without having to paint the ground.
- :: Rugged, four-wheel cart design allows the operator to scan on any type of terrain.
- :: Synchronized dual-frequency antenna allows you to see both deep and shallow objects simultaneously.
- :: One-touch recalibration button lets you transition from one scanning surface to another quickly and easily.

Grade Slope Installations

Multiple Pipes / Conduits

Pipes installed underground with no disturbance to road surface
